

To Whom It May Concern,

I am pleased to recommend **Venkata Karthik Draksharam** for his exceptional contributions during his six-month cybersecurity internship at **Andhra Pradesh Technology Services (APTS)**. He demonstrated a high level of proficiency and initiative, particularly in the areas of automation, container security, and application security testing.

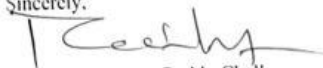

One of his significant achievements was the automation of JavaScript file reconnaissance. Utilizing microservices, he developed a sophisticated tool to scrape the entire source code from active subdomains and domains. This project not only showcased his technical skills but also his ability to streamline and enhance security processes through innovative solutions.

Venkata Karthik Draksharam also exhibited expertise in container security and Static Application Security Testing (SAST). He strengthened application security by using advanced tools and implemented automated workflows for proactive vulnerability detection and remediation, seamlessly integrating with GitHub. He actively engaged in red teaming exercises, conducting thorough Vulnerability Assessment and Penetration Testing (VAPT) and audits on web applications. His hands-on experience equipped him with a deep understanding of threat mitigation techniques and best practices in application security.

Throughout his internship, He displayed a keen ability to learn and adapt, contributing significantly to our cybersecurity efforts. His technical acumen, coupled with a proactive and diligent approach, makes him an outstanding candidate for any role in the field of cybersecurity.

I am confident that **Venkata Karthik Draksharam** will continue to excel in their future endeavors and highly recommend them for any position that demands a strong foundation in cybersecurity, automation, and application security testing.

Sincerely,

Mr. Venkateswara Reddy Challa
Cyber Security Manager
